

Safety Tracker System – helpful information from SVS.

- All equipment will be available to collect at Friday night Scrutiny at Eakin Bros Maydown and on Saturday morning at Robinson's Concrete Cumber. The tracker must be fitted by the crew or their team before they present the car for scrutiny where possible.
- All equipment must be returned to SVS, or to the rally office at the Cumber Claudy, if you retire early from the event.
- The SVS van will be located in the Service area and in Parc ferme / final control at the end of the event for the return of the equipment.

Here are some links to videos to help the competitors with the installation and operation of the equipment:

4Rally Tracker Operation Video:
